

## Co-founder Developer

We develop surgical simulators for training, teaching and evaluation of surgical techniques. The project will be carried out in cooperation of a major medical institute in the area. Send us an e-mail if you are interested in revolutionizing the health market. [osseo4d@web.de](mailto:osseo4d@web.de)

### Your Responsibilities:

- Involvement in the entire software development process (design, development, test, rollout)
- Conception and development of Augmented Reality software products with the help of Unity3D

### Your Profile:

- You have experience as a developer with excellent knowledge of programming language C# and experience with Unity3D. AR/VR experience is favorable.
- You are self-motivated and reliable with a committed and pro-active approach
- You enjoy working in a team and tackling interdisciplinary problems together.
- Good knowledge of spoken and written English. Knowledge of German is a plus.
- Anatomy skills are not required
- BSc/BA in computer science, Business Informatics or relevant field; MSc/MA will be appreciated

### What we offer:

- Get to know the work processes of a growing start-up.
- Further develop your programming skills and implement your own ideas.
- Expand your knowledge through workshops, mentors and open communication in our interdisciplinary team
- Flexible working hours
- Option to become a co-founder and potentially receive the Exist Business Start-up Grant
