INTERNERSHIP CAD

Join Our Team:

You have the opportunity to participate in the development of specialty packaging, closure mechanisms, and modular components combined with rapid prototyping. During the internship, you will learn about the production technology of 3D printing and engage with an experienced designer.

What We Expect from You:
- Ongoing studies in mechanical engineering, construction technology, or a related field.
- Technical affinity, ideally with experience in 3D printing, CAD.
- Communicative skills as well as independent and goal-oriented working methods.
- German or English language skills.

Why PALPRINT?
- Influence and creative freedom in a growing tech startup.
- Participation in new, practical developments.
- A culture of openness and innovation.

About Us: As pioneers in 3D printing for packaging, we focus on sustainability and innovation. Our dynamic team is working on a system solution that redefines the world of industrial packaging.

Apply Now! We are looking for creative minds who want to grow with us. Upload your resume and a short cover letter via email to jobs@palprint.de and become part of our mission to revolutionize the packaging industry!
